JAYESH GANAGAWANE (Data Governance Analyst)

Experienced Data Governance and Compliance Professional with a strong background in implementing, monitoring, and enhancing data controls in financial services. Skilled in data governance frameworks. Proven track record of enforcing compliance with GDPR, BCBS239, DAQF, DAMA, DCAM, DLP, and records retention policies. Specialized in data integrity, quality assurance, and data lineage tracking.

Skilled in safeguarding sensitive data throughout its lifecycle by managing data inventories, trusted sources, and secure data movements. Proficient in Data Privacy and Impact Assessments (PIA, DPIA) and experienced in driving Data Loss Prevention (DLP) to prevent unauthorized data transfers.

Strong collaborator with cross-functional teams in Legal, Cybersecurity, and Regulatory Compliance. Facilitates global data approvals through Data Visa and Data Sanitization Services (DSS) controls for data masking, encryption, and anonymization. Developed applications to classify Personally Identifiable Information (PII), generate probabilistic business term mappings, and create Technical Data Dictionaries for metadata management in Big Query and Collibra.

OVERALL EXPERIENCE
4 Years 6 Months

PRIVACY LAWS
DGPR, CCPA

DATA GOVERNANCE TOOLS
Informatica EDC, CDGC, Collibra DGC

TECHNICAL SKILLS
Programming Languages: Python
Databases: SQL Server, MySQL, PostgreSQL

Cloud Platforms: Google Cloud Platform (GCP)

Data Analysis Tools: PowerBI, Excel, Google Data Studio

Integrated Development Environments (IDEs): Visual Studio Code (VS Code), Anaconda

Design Tools: Visual Paradigm

Project Management and Communication Tools: Jira, Confluence, Slack

Operating Systems: MS Windows, macOS

Experience 2

Data Governance Analyst
Smart Matrix |03/ 04/2023 – Present

Ensured data integrity and compliance by implementing the Application Interface control Develop project concepts and maintain optimal workflow.

Strengthened data integrity by implementing Data Integrity control.

Enhanced data governance by implementing Data Definition, Data Inventory, Trusted Sources, Data Quality and monitoring.

Ensured regulatory compliance by implementing Records Retention Schedules, Records Retention and Disposition, Holds Management.

Established Record of Processing, Privacy Impact Assessments, Internal & External Data Transfers control to track, document, and verify PII processing in compliance with GDPR Article 30.

Implemented Rights of Individuals control to ensure timely and compliant responses to individual rights requests regarding personal data.

Established and implemented Privacy Notices control to ensure transparent communication of personal data processing practices in compliance with applicable data privacy laws.

Implemented Consent and Choice, Implemented and managed Data Visa controls to streamline data approval processes for global projects, Coordinated Data Clinic control to secure and govern data movements across Organization's critical infrastructure

Implemented Data Sanitization Services control to minimize risks associated with production data

Tools Used: Aurora (Issue tracking), Informatica CDGC, Qlik Sense, GCP, MS Excel

DOMAINS
Banking | Finance | Core Trade

ACHIEVEMENTS

1. Awarded in recognition of outstanding efforts during Data Governance stabilization towards Revenue assurance

2. Received Twice Employee of the month

EDUCATION
Bachelor of Engineering (Mechanical Engineering) - 2021
Dr. D Y Patil school of Engineering & Technology,
Pune University

Experience 1

Data Governance – Data Analyst
Unidos Systems | 30/09/2021 – 31/03/2023

Data Quality Assurance: Ensured the accuracy and completeness of revenue data by performing regular audits, reconciliations, and validations, which aligns with Data Governance goals of maintaining data integrity.

Metadata Management: Documented and maintained metadata for revenue-related data fields, such as revenue sources, billing details, and customer segments, supporting consistent data usage and transparency.

Data Dictionary and Standardization: Contributed to the creation of a Data Dictionary for revenue data, defining key terms like ARPU (Average Revenue Per User), churn rate, and revenue recognition, to standardize terminology across departments.

Data Integrity and Validation: Monitored and validated revenue data sources to identify and resolve discrepancies, reducing errors and enhancing trust in revenue- related data for reporting and decision-making.

Data Lineage Mapping: Mapped the flow of revenue data across systems (e.g., billing systems, CRM, and finance platforms) to understand the data lifecycle and dependencies, aiding in impact analysis and process transparency.

Data Access Controls: Enforced access controls to sensitive revenue and billing data, collaborating with IT and compliance teams to protect financial data from unauthorized access.

Master Data Management (MDM): Supported MDM practices by maintaining consistent and accurate records for revenue-related master data, such as product hierarchies, pricing data, and customer classifications.

Adherence to Data Retention Policies: Managed data retention schedules for revenue data to comply with financial and regulatory requirements, ensuring the secure archiving or disposal of data when necessary.

KPI Development and Monitoring: Developed and tracked Key Performance Indicators (KPIs) for revenue metrics, ensuring alignment with business objectives and Data Governance practices for performance monitoring.

Data Reporting Accuracy: Ensured the accuracy of revenue-related reports by vali- dating data inputs, calculations, and assumptions, supporting data governance objectives of data reliability and accountability.

Participation in Data Governance Initiatives: Actively contributed to data governance initiatives within the finance or data management teams, supporting policy up- dates and promoting data quality and integrity standards.

Tools Used: Collibra (DGC), SQL, MS Excel, Power BI
